# Report of Independent Registered Public Accounting Firm

To the Board of Directors and Member of XP Investments, LLC

# Opinion on the Financial Statement - Statement of Financial Condition

We have audited the accompanying statement of financial condition of XP Investment US, LLC (the "Company") as of December 31, 2022, including the related notes (collectively referred to as the "financial statement"). In our opinion, the financial statement presents fairly, in all material respects, the financial position of the Company as of December 31, 2022, in conformity with accounting principles generally accepted in the United States of America.

# **Basis for Opinion**

The financial statement is the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statement based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit of this financial statement in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statement is free of material misstatement, whether due to error or fraud.

Our audit included performing procedures to assess the risks of material misstatement of the financial statement, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statement. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statement. We believe that our audit provides a reasonable basis for our opinion.

March 1, 2023

We have served as the Company's auditor since 2019.

Pricewaterhouse Coopers 22P

# 1. Organization and Summary of Significant Accounting Policies

XP Investments US, LLC ("the Company"), is a securities broker-dealer which principally serves institutional investors. The Company was formed on December 29, 2010 in the State of Delaware. The Company is a wholly owned subsidiary of XP Holdings International, LLC (the "Parent"). The Company is registered as a broker-dealer with the Securities and Exchange Commission (the "SEC") and became a member of the Financial Industry Regulatory Authority ("FINRA") as of October 27, 2011. On December 22, 2012, the Company became a member of the National Futures Association (the "NFA"). Also, the Company is a SIPC (The Securities Investor Protection Corporation) Member, that provides limited coverage to investors on their brokerage accounts if the brokerage firm becomes insolvent. SIPC also, in many cases, protects customers from unauthorized trading in, or theft from, their securities accounts.

On January 30, 2023, the Company has finalized the registration process to become a Swap dealer with the NFA and CFTC. This license will significantly expand the company's existing opportunities in the derivatives markets with US clients. This registration will enable the Company to compete with major global financial groups and deliver new products and services. As a registered broker-dealer and swap dealer, the Company will be subject to a minimum net capital requirement of \$20 million per CFR 23.101.(a)(1)(ii)(A). In preparation of this new net capital requirement, the Parent company has contributed \$13 milion of cash that is reflected within the statement of changes in member's equity.

The Company generates revenue principally by providing securities trading and brokerage services to institutional investors in the United States and Latin American countries. Revenue for these services could vary based on the performance of financial markets around the world.

Following is a description of the significant accounting policies and practices followed by the Company in the preparation of the accompanying financial statement. These policies conform to accounting principles generally accepted in the United States of America.

# **Use of Estimates**

The preparation of the financial statement in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statement. Actual results could differ from those estimates.

#### **Securities Transactions**

Securities transactions are reported on a trade date basis, and securities owned, at fair value are valued at quoted market or dealer quotes. Proprietary securities transactions in regular-way trades entered into for the account and risk of the Company are recorded at fair value on a trade-date basis.

Securities sold, not yet purchased represent obligations to purchase securities at a future date at the then-current market price. This obligation is recorded at the fair value of the securities to be purchased. Because securities sold, not yet purchased at fair value represent obligations of the Company to purchase securities at a future date at the then-current market price, the fair value of the securities is likely to fluctuate prior to the date they are purchased.

# **Securities Transactions**

Securities transactions are reported on a trade date basis, and securities owned, at fair value are valued at quoted market or dealer quotes. Proprietary securities transactions in regular-way trades entered into for the account and risk of the Company are recorded at fair value on a trade-date basis.

Securities sold, not yet purchased represent obligations to purchase securities at a future date at the then-current market price. This obligation is recorded at the fair value of the securities to be purchased. Because securities sold, not yet purchased at fair value represent obligations of the Company to purchase securities at a future date at the then-current market price, the fair value of the securities is likely to fluctuate prior to the date they are purchased.

The Company uses Pershing, LLC, Interactive Brokers, LLC, ED&F Man, APEX Clearing Corp. and RJ O'Brien & Associates LLC to process its customers' securities transactions and to provide custodial and other services. The Company pays fees on a per transaction basis for securities transactions and interest on balances due to these firms. The Company uses HSBC Securities Inc for execution and clearing derivatives transactions and shall maintain with HSBC at all times cash, US government securities and other collateral that HSBC deems acceptable to satisfy all initial or additional margin requirements. The Company also uses the Prime Broker NatWest Markets PLC in relation to FX transactions. The Company pays service fees for interest swaps transactions and FX transactions.

# Receivables from broker-dealer and Clearing Organization

Receivable from broker dealers include amounts receivable from unsettled trades, accrued interest receivables and cash deposits. A portion of the Company trades and contracts are cleared through a clearing firm and settled daily between the clearing firm and the Company. Because of this daily settlement, the amount of unsettled credit exposure is limited to the amount owed to the Company for a very short period of time. In December 2022, due from broker dealer was \$40,909,281, including \$1,250,000 in restricted cash and a \$750,000 deposit in Natwest reflected on prepaid and other assets. Historically, the clearing firm has demonstrated the ability to continuously, without delay or interruptions, make the Company's cash balances available to the Company and no credit losses were recognized during the year. The Company continually reviews the credit quality of its counterparties and clearing firm.

# Receivables from customers

Receivable from customers include fees earned on Foreign Exchange Transactions ("FOREX") and other short term receivables. The Company considers forward looking information and expectation of losses in developing and documenting the allowance at inception and each reporting period instead of basing the allowance only on incurred losses. Also, the Company determines if an allowance should be recognized even for current receivables that are not yet past due. In December 2022, accounts receivable were \$12,819,243 and the Company recognized \$556,149 in allowance for doubtful accounts.

# **Recent Accounting Pronouncements**

Changes to United States Generally Accepted Accounting Principal ("US GAAP") are established by the Financial Accounting Standards Board ("FASB") in the form of Accounting Standards Updates ("ASUs") to the FASB Accounting Standards Codification ("ASC"). The ASU 2019-12 "Income taxes" was issued and adopted by the Company, however no material impact on the financial statement. There were no other new relevant ASUs issued during the current fiscal year.

# Cash and Cash Equivalents and Restricted Cash

The Company considers all highly liquid debt instruments having maturities of three months or less at the date of acquisition to be cash equivalents. The Company may, during the ordinary course of business, maintain account balances in excess of federally insured limits. The Company does not expect any risk of loss with regard to these deposits. The Company refers to money that is held for a specific purpose and therefore not available to the company for immediate or general business use as restricted cash

# **Property and equipment**

Property and equipment are stated at cost. Expenditures that materially increase the useful lives of property and equipment are capitalized, while ordinary maintenance and repairs are expensed as incurred. Depreciation is computed using the straight-line method over the estimated useful lives of the respective assets, ranging from three to ten years. Leasehold improvements are amortized over the shorter of the useful life of those leasehold improvements and the remaining lease term, ranging from three to ten years.

# Operating lease right of use

The Company records an asset and liability are recorded at the present value of the lease payments on the statement of financial condition. Right-of-use assets are subject to the same considerations as other nonfinancial assets, such as property, plant, and equipment.

#### **Restricted stock units**

The Parent established the Restricted Stock Plan ("RSU Plan") approved by the Board of Director's on December 6, 2019 and the first grant of units under the RSU Plan was on December 10, 2019. Under the RSU plan, units are awarded at no cost to the recipient upon their grant date. RSUs are usually granted on an annual basis, their vesting conditions are service-related and they vest at a rate determined in each granted date. The limit to vest is determined at the grant date of each new grant. After the vesting periods, common shares will be issued to the recipients.

If an eligible participant ceases to be employed by the Company within the vesting period, their rights will be forfeited, except in limited circumstances that are approved by the Company's Board of Directors.

Estimating fair value for share-based payment transactions requires determination of the most appropriate valuation model and underlying assumptions, which depends on the terms and conditions of the grant and the information available at the grant date.

The Company uses certain assumptions to estimate fair value which include the following:

- Estimation of fair value based on equity transactions with third parties close to the grant date;
- Estimating the turnover rate using historical data and expected trends.

#### Income taxes

The Company is a wholly owned subsidiary of the Parent and is considered a disregarded entity for income tax purposes. Accordingly, the Company's results are included in the consolidated federal and state income tax returns of the Parent. The Company reimburses the Parent for taxes incurred and attributable to the Company's income reported on the Parent's tax returns. Therefore, any overpayment of taxes is subject to reimbursement by the Parent.

# XP Investments US, LLC Notes to Financial Statement December 31, 2022

The Company records any income tax expense and liability based upon its operations on a standalone basis, even though the Company is part of the consolidated income tax returns.

The Company accounts for income taxes in accordance with the Income Taxes Topic of the FASB Accounting Standards Codification ("ASC"). The Income Taxes Topic requires that deferred income tax balances be recognized based on the differences between the financial statement and income tax bases of assets and liabilities using the enacted tax rates. The Company recognizes the effect of income tax positions only if those positions are more likely than not of being sustained. Recognized income tax positions are measured at the largest amount that is greater than 50% likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs. It was determined that there were no uncertain tax positions that are not more likely than not to be sustained as of December 31, 2022. See Note 7, Income Taxes.

# Fair Value of Cash and Cash Equivalents, Restricted Cash, Due from Broker-Dealers, Accounts Receivable, Due from Affiliate, Accrued Expense, and Other Liabilities

The carrying value of cash and cash equivalents, restricted cash, due from broker-dealers, accounts receivables, due from affiliate, accrued expenses, and other liabilities approximates fair value due to the short maturity of these instruments. None of the financial instruments are held for trading purposes. The firm periodically assesses the collectability of accounts receivables and records a provision for uncollectable receivables, if deemed necessary.

# 2. Cash and Cash Equivalents and Restricted cash

The Company has \$1,250,000 on deposit with a clearing organization as part of its clearing agreement. This amount is included in due from broker dealers on the statement of financial condition. The Company has \$750,000 on deposit with a financial institution as part of a guarantee agreement, which is included in prepaids and other assets on the statement of financial condition. The Company also has \$62,391 at a financial institution in a special reserve account for the exclusive benefit of customers in accordance with SEC Rule 15c3-3 as it relates to commission rebate from brokers, which is reflected in cash and cash equivalents on the statement of financial condition.

The following table provides a reconciliation of cash and cash equivalents and restricted cash reported within the statement of financial condition to the statement of changes in cash flows.

Total cash is \$18,198,392, including \$62,391 a special reserve account for the exclusive benefit of customers and there are no cash equivalents.

Cash and cash equivalents	\$18,198,392
Restricted cash	2,000,000
Total cash and restricted cash at the end of year	\$ 20,198,392

# 3. Property and Equipment

Property and equipment consist of the following:

Office equipment	1,723,299
Furniture and fixtures	827,407
Leasehold improvements	1,101,789
	3,652,495
Less: accumulated depreciation and amortization	(2,251,416)
Net property and equipment	\$ 1,401,079

# 4. Operating lease right of use assets

The Company is obligated under 3 non-cancelable leases for office space and 1 sublease, expiring in December 2023, October 2026 and December 2029. The Company records an asset and liability at the present value of the lease payments, as reflected on the statement of financial condition. The average discount rate considered for the lease was 6.3%. In January 2023, the Company renewal the lease agreement that was originally set to expire in December 2023, but has been extended to February 2029.

	Right-of-use assets	Lease liabilities	Total lease expense
As of December 31, 2021	14,537,096	(16,493,146)	-
Lease expense	(1,885,608)	(1,010,681)	(2,896,288)
Payment of lease liabilities		3,092,072	
As of December 31, 2022	12,651,488	(14,411,755)	(2,896,288)

#### 5. Commitment and Contingencies

# Commitments

During the ordinary course of business, the Company may maintain cash balances in excess of amounts insured by the Federal Deposit Insurance Corporation. The Company had balances in excess of insured limits of \$17,698,392 as of December 31, 2022.

In August, a client failed to meet a margin call and was forced by Pershing to liquidate its position. Per the terms and conditions of the agreement with Pershing, if the customer fails to cover the margin call, Pershing has the right to collect the amount due directly from the Company. The Company is evaluating the possibilities of collecting the loss from the client.

# Legal Matters

During the normal course of operations, the Company, from time to time, may be involved in lawsuits, arbitrations, claims, and other legal or regulatory proceedings. The Company does not believe that these matters will have a material adverse effect on the Company's financial position.

# 6. Fair Value Measurements

FASB ASC 820-10 Fair Value Measurements and Disclosures, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820-10 are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs. Following is a description of the valuation methodologies used for assets measured at fair value.

The financial instruments of the Company are reported in the statement of financial condition at their fair values, or at carrying amounts that approximate fair values because of the short maturity of the instruments. When quoted market prices are unobservable, management uses quotes from independent pricing vendors based on independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating and other factors such as credit loss assumptions. The pricing vendors may provide the Company with valuations that are based on significant unobservable inputs, and in those circumstances the Company classifies the fair value measurements of the investment securities as Level 3.

Management conducted a review of its pricing vendor to validate that the inputs used in that vendor's pricing process are deemed to be market observable or unobservable as defined in the standard. Based on the review performed, management believes that the valuations used in its financial statement are reasonable and are appropriately classified in the fair value hierarchy. There were no instances in which unobservable inputs were used as of December 31, 2022.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Company's assets at fair value as of December 31, 2022:

	<u>Le</u>	evel 1	Level 2	<u>Le</u>	evel 3	<u>Total</u>
Assets						
Securities owned - Corporate Bonds	\$	-	\$ 18,315,869	\$	-	\$ 18,315,869
Securities owned - Sovereign Debt		-	1,121,850		-	1,121,850
Liabilities						
Securities sold not yet purchased - Corporate Bonds		-	13,376,129		-	13,376,129
Securities sold not yet purchased - Sovereign Debt		-	=		-	=

#### 7. Income Taxes

The Company recorded an income tax expense of \$914,731 for the year ended December 31, 2022 which would be the Company's tax expense if the Company filed income taxes under the separate return method. During 2022, the Company made payments totaling \$1,432,758 to the Parent, and has a deferred tax asset of \$7,335,201, reflected on the statement of financial condition.

A reduction of the carrying amounts of deferred tax assets by a valuation allowance is required if, based on the available evidence, it is more-likely-than-not that such assets will not be realized. Accordingly, the need to establish valuation allowances for deferred tax assets is assessed annually by the company based on the consideration of all available positive and negative evidence using a "more-likely-than-not" standard with respect to whether deferred tax assets will be realized. This assessment considers, among other matters, the nature, frequency and severity of current and cumulative losses, actual earnings, forecasts of future profitability, the duration of statutory carryforward periods, the company's experience with loss carryforwards not expiring unused and tax planning alternatives. The Company believes there is sufficient positive evidence, along with the current cumulative income position and the forecasts of future profitability that support the decision that a valuation allowance is not required.

The Company believes it is more-likely-than-not that it will realize its deferred tax assets.

During the year ended December 31, 2021, the Company amended state tax returns noting receivables of \$442,075 which were collected during the year ended December 31, 2022. The Company did not correctly record such amended returns as receivable in the prior year and instead recorded the collection as an out of period adjustment during the year ended December 31, 2022 as the impact to both the prior period and current period was not deemed material.

The Company follows the accounting guidance for uncertainty in income taxes using the provisions of ASC 740 – "Income Taxes". Using the guidance, tax positions initially need to be recognized in the financial statement when it is more-likely-than-not the position will be sustained upon examination by the tax authorities. As of December 31, 2022, the Company had no uncertain tax positions that qualify for either recognition or disclosure in the financial statement.

As of December 31, 2022, the Company's tax years 2018 and thereafter remain subject to examination for the State of Florida, New York, New York City and tax years 2018 and thereafter for Federal. As of December 31, 2022, there are no ongoing audits.

The temporary differences that created deferred tax assets and liabilities are as follows as of December 31, 2022:

#### **Deferred Tax Assets**

Reserve for bad debts	2,473,389
Lease liabilities	3,554,966
Bonus accrual	2,628,137
RSU	2,157,941
Other	971
	10,815,404
Deferred Tax Liabilities	
Property and equipment, net	(359,444)
Operating lease and right of use	(3,120,758)

Operating lease and right of use	(3,120,758)
	(3,480,203)

Deferred Income Tax Assets, net 7,335,201

# 8. Net Capital Requirements

The Company is subject to the Securities and Exchange Commission's Uniform Net Capital Rule (Rule 15c3-1), which requires the maintenance of minimum net capital and requires that the ratio of aggregate indebtedness to net capital, both as defined, shall not exceed 15 to 1. At December 31, 2022, the Company had net capital of \$46,193,096 which was \$44,706,474 in excess of its required capital of \$1,486,623. The Company's net capital ratio was 0.48 to 1.

# 9. Related Party Transactions

As of December 31, 2022, the Company recorded a receivable fee due from XP Investimentos CCTVM S/A ("XPI"), an affiliate of the Company, of \$185,294.

# XP Investments US, LLC Notes to Financial Statement December 31, 2022

The Company also has an expense sharing agreement with XPI which requires the allocation among the parties of certain back office support and general operational routines, compliance services and employee expenses. The expense allocation is fixed based on the number of full-time employees assigned to this area.

The Company also has a service agreement with XPI which receives the benefits of services provided by the Company and requires the allocation among the parties of employees expenses. The Company recorded a receivable due from XPI of \$646,891 as of December 31, 2022.

As of December 31, 2022, the Company was due \$150,010 from Itau Unibanco S/A, which is recognized as accounts receivable in the statement of financial condition.

The Company also has an expense sharing agreement with XP Advisory US, Inc ("XP Advisory"), which receives the benefit of services provided by the Company and requires the allocation among the parties of certain back office support and general operational routines, compliance services and employee expenses. The Company recorded a receivable due from XP Advisory of \$310,109 as of December 31, 2022.

The Company also has an reimbursement agreement with XP INC. XP INC had created a long term incentive plan, which certain executives, directors, employees and other service providers hired by the Company ("Beneficiaries") would be granted a certain number of restricted stock units representing the right to receive shares to be issued by XP INC upon the satisfaction of certain conditions and vesting requirements, pursuant to the respective contracts ("RSU"). The Company, as subsidiary of XP INC, benefits from the Plan offered to its local Beneficiaries and is required to reflect the corresponding expenses in its local books, regardless of the fact that the equity-settlement is made by XP INC. The RSUs awarded and the respective shares under the Plan are issued by XP INC, that bears the financial and economic costs of the Plan in behalf of the Company. The Company agrees to reimburse XP INC for all the expenses and costs regarding the RSUs awarded and the respective shares delivered by XP INC to the beneficiaries of the Company.

# **Risk Concentrations**

# **Clearing and Depository Concentrations**

The clearing and depository operations for the Company's securities transactions are primarily provided by a brokerage firm whose principal office is in Jersey City, New Jersey. # **Other Risk Concentrations**

In the normal course of business, the Company's customer activities involve the execution, settlement, and financing of various customer securities transactions. These activities may expose the Company to off-balance-sheet risk in the event the customer or other broker is unable to fulfill its contractual obligations and the Company has to purchase or sell the financial instrument underlying the contract at a loss.

The Company's customer securities activities are transacted on either a cash or margin basis. In margin transactions, the Company, through its clearing firm, extends credit to its customers, subject to various regulatory and internal margin requirements, collateralized by cash and securities in the customers' accounts. In connection with these activities, the Company executes customer transactions involving the sale of securities not yet purchased, substantially all of which are transacted on a margin basis subject to individual exchange regulations. Such transactions may expose the Company to significant off-balance-sheet risk in the event margin requirements are not sufficient to fully cover losses that customers may incur. In the event a customer fails to satisfy its obligations, the Company may be required to purchase or sell financial instruments at prevailing market prices to fulfill the customer's obligations. The Company seeks to control the risks associated with its customer activities by requiring customers to maintain margin collateral in compliance with various regulatory and internal guidelines. The Company monitors required margin levels daily and, pursuant to such guidelines, requires the customer to deposit additional collateral or to reduce positions when necessary.
